ABOUT

AI and ML Enthusiast passionate about building real-world, impact-driven solutions. I develop full-stack applications around AI systems and explore adjacent domains such as Blockchain, Cybersecurity, and Web Applications while keeping AI at the core.

EDUCATION

Dayananda Sagar College Of Engineering

B.E. in Information Science and Engineering **GPA: 8.5**

September 2024 – Present

Bengaluru, India

EXPERIENCE

Full Stack Developer Intern

Indian Chess Academy (Vina EduTech Pvt. Ltd.)

April 2026 – Present

Remote [Link](#)

- Built the academy’s LMS platform from scratch — architecting the full backend with secure APIs, database schemas, and scalable microservices, alongside role-based dashboards and integrated payment gateways. Secured 1st Place in hackathon for this project and secured this internship.

Research Project Lead

Technogrep Solutions LLP (via DSCE ISE Dept)

October 2025 – March 2026

Bengaluru, India

- Led the development of Drishti-AI, a natural language-driven framework for campus incident analysis using DeepSeek’s Text-to-SQL capabilities. Project delivered through an MOU between DSCE and Technogrep Solutions LLP under guidance of Dr. Annapurna P Patil (HoD, ISE) and Ranjit Sankarasubramanian (Managing Partner, Technogrep).

SKILLS

Languages: C, C++, Python, JavaScript, TypeScript, SQL

Database: Firebase, Supabase, MongoDB, ChromaDB, SQLite, PostgreSQL, MySQL, Azure

AI & ML: TensorFlow, OpenCV, YOLO, XGBoost, SHAP, Hugging Face, Gemini API, Ollama, RAG Systems, Langchain, Reinforcement Learning

Frameworks: React, FastAPI, Framer Motion, Tailwind CSS, NetworkX, scikit-learn

Security: Semgrep, OWASP, SQLi Detection, Command Injection Prevention

Tools: Git, GitHub, Vercel, Docker, MetaMask, Polygon Amoy, VS Code, JupyterNotebook, Agentic tools

Data Science: Pandas, NumPy, Matplotlib, PowerBI

Blockchain: NFC Integration, Smart Contracts, Digital Identity

PROJECTS

- **Antraa – Privacy-First Synthetic Data & Bias Detection Platform (Top 10 / 150+ teams)** [Github](#)
100% local platform with 7 AI agents for synthetic data generation and bias auditing. Implements formal differential privacy with auto-mapping to HIPAA, GDPR, GLBA, and EEOC. Five specialized agents detect hidden proxies (zip codes encoding race, job titles encoding gender) and generate executive-ready compliance audits for regulated industries.
- **Sanjeevani – Agentic Diagnostic Risk Assistant** [Github](#)
Multi-agent ICU diagnostic system analyzing patient vitals via Clinical NLP, Medical RAG, and predictive trend analysis. Integrated NFC hardware for instant, secure access to patient histories. Built at Ignisia AI Hackathon as Team Atrangi.
- **Siddhi AI – Enterprise Credit Scoring Platform** [Github](#) | [YouTube](#)
AI-powered credit scoring system trained on 1.8M loan repayment records using XGBoost achieving 96.8% accuracy. Generates composite beneficiary credit scores by analyzing financial history and alternative consumption data (utility bills, rental payments) to enable secure, instant digital lending for NBCFDC.
- **Kavach – AI Security Copilot** [Github](#)
AI-driven security copilot with 9 protection layers including terminal interception, live security scanning (Semgrep for OWASP/SQLi), and RAG-powered codebase analysis. Integrated 5-agent code review system using FastAPI, Ollama (phi4-mini), ChromaDB, and XGBoost for malicious package detection. Fully local deployment.
- **Raahi – Blockchain Tourist Safety Platform (Top 50 / SIH 2025)** [Github](#)
Blockchain-powered safety system on Polygon network using NFC smart-wristbands as digital IDs for tourists. Immutable incident logging via smart contracts with offline SMS fallback. Firebase backend with Kotlin mobile app for real-time emergency response.
- **Kara-AI – Multi-Modal Interview Coach** [Github](#) | [YouTube](#)
Intelligent interview coaching platform with dynamic, context-aware questioning. Analyzes live video, audio, and speech to provide objective feedback on eye contact, speaking pace, filler words, and content quality. Full-stack multi-modal AI application built in 24 hours at Hackverse .

RESPONSIBILITIES

- **Tech Team Member, Numerano (DSCE)** – Contributing to development, event tech, and engineering support
- **Tech Team Member, AWS Cloud Club DSCE** – Supporting cloud computing initiatives and technical workshops
